

Discipline Information

The following dates are in (dd/mm/yyyy) format.

Code: RAL5895 - 1 Type: POS
Name: Scientific article writing techniques
Concentration area: Ciências da Saúde Aplicadas ao Aparelho Locomotor (17142)

Approval dates:

CCP: 11/09/2020 CPG: 06/10/2020 CoPGr:

Activation date: 06/10/2020 Inactivation date:

Workload:

Total: 150 h Theory: 2 h Practice: 8 h Study: 5 h

Credits: 10 Duration: 10 weeks

2360267 - Luiz Garcia Mandarano Filho - 06/10/2020 until today
Professors: 2933658 - Carlos Fernando Pereira da Silva Herrero - 06/10/2020 until today
2971133 - Daniel Augusto Carvalho Maranhão - 06/10/2020 until today

Objectives:

article.

SPECIFIC OBJECTIVES:

Offer knowledge on:

1. Basic statistics
2. Literary search tools in databases
3. Introduction to scientific methodology
4. Writing techniques
5. Introduction to systematic review and meta-analysis

Rationale:

The preparation of a scientific article, despite the different requirements of the journals, follows a pattern with many characteristics in common. It is necessary for the proponent to publish a study, whatever its nature, to master some concepts and tools considered fundamental. We are among them, the knowledge of the database variables and their search methods, writing techniques in the English language and in the educated standard, notions of statistics and the scientific method, in addition to the classic fundamental structure of an academic publication.

The professors responsible for the discipline will participate determinedly in the presentation of the theoretical concepts of each topic and in group activities for questions and

improvement of the acquired knowledge, stimulating the debate and, at the same time, the individual search for improving the writing.

We believe that such discipline is necessary due to the growing need to publish research in journals of unquestionable quality and with increasing scientific rigor.
